

CASE STUDY

This demonstrates PacLights’s ability to retrofit for pedestrian areas with BU series LED light bulbs, creating lighting plans that reduce the number of the wattage consumption, yet still maintain a bright, even appearance. Ultimately, the pedestrian areas at CISCO will see a great amount in energy and maintenance savings within a decade.

CISCO buildings pedestrian areas - San Jose, CA

post light LED retrofit

bollard light LED retrofit

BU series LED Light Bulb
30W-50W LED
3000/4000/5000/6000K
