CCT & LUMEN SELECTABLE with PHOTO CONTROL (3-IN-1) on selected models

CCT SELECTABLE

Selected models (-3CCT-) are equipped with color temperature settings ranging from: 3000K (Warm White), 4000K (Neutral White) and 5000K (Daylight). Simply use the switch directly on the fixture to select the desired color temperature and then install. Selectable color temperature technology removes the guesswork of choosing the correct color temperature for your space. Select 3000K in applications requiring warm and inviting light, select 4000K for a slightly cooler light appearance, select 5000K in areas requiring bright, crisp light. Simply select by adjusting the dip switch.

LUMEN SELECTABLE

Selected models (-3CCT-) are equipped with the dip switch for lumen to be adjusted to 100%, 90%, 80% or 70% of the total output.

PHOTOCONTROL

Photocell Control allows ON/OFF switching the luminaires, to be determined by the amount of daylight present. Specified low light levels at dusk will turn lights ON. When sufficient daylight returns at dawn, the lights automatically turn OFF. Automatic lighting controls save energy. It can be disabled by adjusting the dip switch.
