**KEY FEATURES****Color Selectable** on selected models**Adjustable module angle** for beam controlsOptional **Bi-level motion control****NEMA control receptacle** standard on all models**Photocell control** options available**TECHNICAL SPECIFICATIONS****COMPLIANCE****UL Listed**

Suitable for wet locations

IESNA LM79 & LM-80 Testing

PacLights LED luminaires have been tested by an independent laboratory in accordance with IESNA LM-79 and LM-80.

DLC QualificationSelected models of this product are on the Design Lights Consortium (DLC) Qualified Products List and are eligible for rebates from DLC Member Utilities. To view our DLC qualified products, please consult the DLC Qualified Products List at www.design-lights.org/qpl**OPTICAL****LEDs**

Long-life, high-efficacy, surface-mount LEDs

Lifespan

100,000-hour LED lifespan based on IES LM-80 results and TM-21 calculations

Color Rendering Index

>80

Beam Angle35/55/75w models: 110°; 150w models: 90°. Light module angle adjustable $\pm 90^\circ$.**Color Uniformity**

PacLights' range of Correlated Color Temperature follows the guidelines of the American National Standard for Specifications for the Chromaticity of Solid State Lighting (SSL) Products, ANSI C78.377-2017

OTHER**5-Year Limited Warranty****

The PacLights 5-year, limited warranty covers light output, driver performance and paint finish.

****PacLights's warranty is subject to all terms and conditions found at paclights.com/warranty****CONSTRUCTION****IP Rating**

IP 65 Rated

Ambient Temperature

Suitable for up to 50° C (122° F) ambient temperature

Cold Weather Starting

The minimum starting temperature is -40 F°/-40° C

Housing

Die-cast aluminum housing, Silicon Gaskets

Finish

Our environmentally friendly polyester powder coatings are formulated for high-durability and long-lasting color, and contain no VOC or toxic heavy metals.

Mounting Methods

2" to 3" OD pole top tenon

Green Technology

Mercury and UV free, and RoHS compliant. Polyester powder coat finish formulated without the use of VOC or toxic heavy metals.

Lens

Glass (35w/55w/75w models); Polycarbonate (150w models)

ELECTRICAL**LED Driver**0-10V Dimmable. Input Voltage: 120-277V, 50-60 Hz (optional 480v input)
Power Factor > 0.9; THD < 15%**Control Receptacle**

NEMA 7-prong twist-lock receptacle. Compatible with ANSI C136.1 3-prong twist-lock photocell, or C136.41 0-10v 5 or 7-prong twist-lock dimming controls.

STANDARD FEATURES

Light Module Angle Adjustable

On all models, light module can be adjusted to $\pm 90^\circ$ for beam control in various applications.

NEMA Twist-lock Controls Compatible

Pre-installed with NEMA 7-prong twist-lock receptacle. Compatible with ANSI C136.1 3-prong twist-lock photocell, or C136.41 0-10v 5 or 7-prong twist-lock dimming controls.

CONTROLS Option

Bi-level motion control (option: -MC)

Microwave occupancy control sensors are designed to detect motion through materials such as plastic, glass, and thin non-metallic substances. They are equipped with a 3-step dimming function that is ideal for areas where gradual changes in lighting are preferred before a complete shutdown. If the daylight sensor feature is activated, it can turn off the light based on predetermined levels of ambient light. The settings for these functions can be adjusted using dip switches or an optional wireless commissioning device.

Photocell controls (options: -TLP/-DLH/-DLM)

PacLights advanced electronic **SE-TLP Series** Photocontrol provides a unique, durable, and multi-volt control especially designed for 15 years of operation. It utilizes inter-locking base/cap design for excellent environmental housing. High temperature base material, along with a UV stabilised, opaque housing ensure our control will last years without degradation. PacLights uses a process of IR filtering a phototransistor which in turn gives a human eye response along with long-term, drift free light sensing for the life of the control.

- Multi-volt operation
- Daylight harvesting models
- Mid-Night dimming models
- High-temperature components
- MOV surge protection
- Meets or exceeds ANSI C136.10

for detail refer to **SE-TLP Series** specification

SURGE PROTECTOR Option

Secondary surge protector (option: -SP)

Secondary surge protector can act as the second line of defense, in addition to the LED driver's integrated lightning arrester.
